CAREER HIGHLIGHTS

Senior DevOps Engineer with 9+ years of experience in application operations, cloud infrastructure, and CI/CD automation. Proven expertise in AWS/Azure, Kubernetes, Terraform, and production reliability for business-critical applications. Strong background in incident management, automation, and cost optimization, with experience mentoring teams and driving DevOps best practices. Seeking Senior DevOps roles with ownership and leadership responsibility.

SKILLS & ABILITIES

- **Operating System:** Linux (RHEL, CentOS, Ubuntu), Windows
- **Cloud:** AWS / Azure (Compute, Networking, IAM, Storage, Cost Management)
- **Containers:** Docker, Kubernetes (EKS/AKS), Helm
- **CI/CD:** Jenkins, GitHub Actions, Azure DevOps, GitLab CI
- **IaC:** Terraform, Ansible
- **Web & Middleware:** Apache, Nginx, Jboss, Tomcat
- **Database:** MySQL, Oracle, PostgreSQL, Informix
- **Monitoring & Observability:** Prometheus, Grafana, Nagios, Splunk, ELK
- **Scripting:** Shell Scripting, Python
- **Ticketing Tool:** JIRA, Service Now

WORK EXPERIENCE

GIESECKE & DEVRIENT

Oct 2022 – Present

Senior DevOps Engineer

- Designed, implemented, and owned end-to-end CI/CD pipelines using Jenkins, automating build, containerization, and deployments across LAB, UAT, Pre-Prod, and Production environments.
- Managed containerized workloads using Docker and Kubernetes (EKS/AKS) across on-prem and cloud infrastructure, ensuring scalability, reliability, and zero-downtime deployments.
- Built and maintained Infrastructure as Code using Terraform, standardizing cloud environments and reducing manual provisioning errors.
- Played a key role in production operations, owning deployment strategies, monitoring, and incident response to ensure high availability and system stability.
- Implemented monitoring and observability using Prometheus, Grafana, Splunk, and Zabbix, enabling proactive alerting and faster incident resolution.
- Led root cause analysis (RCA) for critical production incidents, improving MTTR and preventing recurring issues.
- Automated operational workflows and system checks using shell scripting, improving efficiency and reliability.
- Collaborated closely with development, QA, and security teams to improve release quality and DevOps maturity.
- Acted as a technical mentor for junior engineers and supported DevOps best-practice adoption across teams.

Senior System Engineer

- Worked as a core DevOps engineer for large-scale payment, m-commerce, and digital financial platforms.
- Managed and optimized AWS cloud infrastructure, ensuring high availability, security, and cost efficiency for mission-critical applications.
- Built and maintained CI/CD pipelines using Jenkins, supporting frequent and reliable releases to UAT and Production.
- Supported containerized deployments using Docker, and managed application deployments on JBoss and Tomcat.
- Implemented monitoring and logging solutions using Splunk and Nagios, improving system visibility and uptime.
- Automated data extraction, health checks, and maintenance tasks using Linux shell scripting.
- Actively participated in production incident management and DR readiness, ensuring platform resilience.

Linux & Platform Engineer

- Managed and operated **large-scale Linux server environments** supporting telecom and enterprise applications.
- Designed and implemented **monitoring solutions using Zabbix and Nagios**, enabling proactive issue detection.
- Planned and executed **Disaster Recovery (DR) strategies**, backups, and restoration processes to ensure service continuity.
- Automated server maintenance, log rotation, and health checks using **shell scripting**.
- Supported geographically distributed infrastructure across **PAN India**, ensuring high uptime and reliability.
- Actively participated in production incident management and DR readiness, ensuring platform resilience.

PROJECTS

Project #1	JIO – DevOps & Platform Engineering
Role	DevOps Engineer
Tech	AWS, EKS, Jenkins, Docker, Kubernetes, Git, Oracle, Grafana, Splunk
Responsibilities	○ Built and maintained CI/CD pipelines for microservices-based deployments. ○ Deployed and managed applications on AWS EKS across non-prod and production environments. ○ Created Grafana dashboards and integrated monitoring for production observability.

Project #2	BSNL, MTNL (India)
Role	DevOps Engineer
Tech	VMware, Linux, Jenkins, Git, Docker, Tomcat, Oracle
Responsibilities	○ Build & Maintain continuous integration and continuous deployment pipeline using Jenkins ○ Writing Dockerfile for docker images ○ Manage source code repository using Git ○ Deployment artifacts in Tomcat servers ○ Maintained the DR environment to ensure fault tolerance.

Project #3	DTAC (Thailand), Roshan (Afghanistan), One Card (Africa), Telecel (Africa), Express Union (Africa)
Role	DevOps Engineer
Tech	AWS, Linux, Jenkins, Git, Docker, Jboss, PostgreSQL, Splunk, Nagios
Responsibilities	○ Installation and configuration managed services for TopUp platform and consumer banking over the cloud. ○ New build release and Jenkins plugins built for developing CI/ CD pipelines for UAT and Production and for automation jobs ○ Created dashboards and performed proactive logging and service monitoring in Splunk and Nagios ○ Manage source code repository using Git ○ Deployment artifacts in Jboss servers ○ Maintain DR environment for fault taulrance.

CERTIFICATIONS

- AWS Solutions Architect Associate – Issued by Kodekloud
- Azure Administrator Associate - Issued by Kodekloud

EDUCATION

- **B.E. (Electronics and Communication Engineering)**
Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal (2012-2015)
CGPA – 7.66
- **Polytechnic Diploma (Information Technology)**
Board Of Technical Education, Delhi (2008-2011)
Percentage – 76%
